

Current and Future Air Challenges in New Mexico

AWMA Rocky Mountain
November 17, 2009

Ozone

- Four Corners, border area near current standard
- EPA re-evaluation of ozone standards
- Four Corners: 19,000 wells, 12,000 projected; 3840 MW power generated
- Transport issues

Fugitive Dust

Fire

Mercury

Climate Change

- Inventory and projections
- Influences ozone and ammonia concentrations
- Exacerbates dust issues
- How to integrate with criteria pollutant air quality management?
- What will the federal program look like?
